

**FACTS  
ABOUT INDOOR CLIMATE SYSTEMS**

**DIRIVENT® FOR PRECISE TEMPERATURE AND HUMIDITY CONTROL AT  
INDEPENDENT NEWSPAPERS CITYWEST, DUBLIN**

Independent Newspapers, run their large printing press facility at Citywest in Dublin. Constructed in ----, the printing press is a modern facility, housed by glass and designed for maximum productivity for such a large scale working area.

In such an environment, maintaining the right indoor climate is very important and a constant floor-to-ceiling temperature is of great importance for industrial applications such as printing facilities.

The Dirivent air conditioning system was the solution chosen by Fläkt Woods and -----, to ensure this constant temperature level was maintained in the printing press area at all times.

Dirivent provides full control over temperature and airflow in all types of premises with ceiling heights of four meters or more. It is capable of moving large volumes of air over long distances without the need for extensive duct installations. -----
